Kosmidis & Partner is a law firm based in Thessaloniki, Greece, with particular expertise and fields of activity in transnational legal issues. The law firm maintains offices in Stuttgart (Germany) and Athens and has established a pan-European network with several international participations and cooperations. Kosmidis & Partner collaborates with companies in the German-speaking countries that are active or are planning business activities in Greece. All associates are fluent speakers of German and English, which is the standard language at Kosmidis & Partner. Some members of the team of associates are licenced under both German and Greek law. Kosmidis & Partner is certified by TUV-CERT – TUV Zertifizierungsgemeinschaft e. V. – an umbrella organisation of the German and Austrian technical inspection associations.

Field of activities

The focus of the activities is on company and corporate law, in particular, on the establishment of new businesses, mergers and ac-

quisitions, trademark rights and related issues in Greece. The area of renewable energies – especially of PV – is a key element for Kosmidis & Partner together with all legal issues related to the operative business of international companies and corporations. The law firm assists Greek and foreign investors with their application for development and public subsidy grants in Greece. It understands the promotion of renewable energies as a sustained contribution to meeting the world's rising energy demands and to spurring economic growth. Kosmidis & Partner law firm supports this development specifically in the PV sector. It assists corporate and private customers with the planning and licencing procedures up to the realization of their specific projects. The consultancy services provided by Kosmidis & Partner embrace all legal agreements required for the construction of a PV system in Greece. The network of project companies, engineers, realtors, notaries, tax advisers, manufacturers, general contractors and banks enables Kosmidis & Partner to provide its customers with solutions tailored to the specific needs of each individual project stage.
